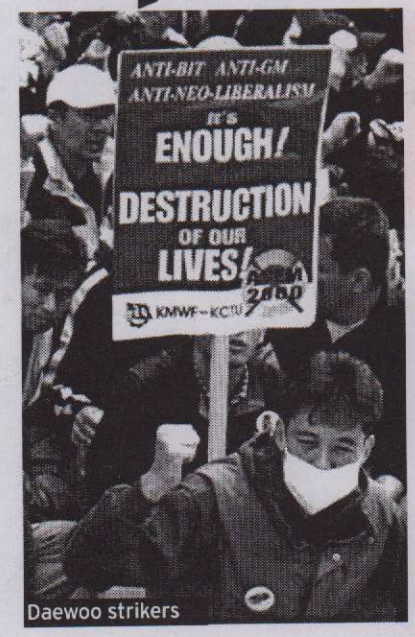
www.workerspower.com

capitalism

is a global system that condemns millions to poverty and famine, unemployment and low pay, insecurity and unhappiness. Its sole purpose is to make ever bigger profits for a tiny minority of rich people.



Daewoo strikers

workers power

...is a revolutionary socialist organisation, committed to fighting capitalism. We say the needs of the vast majority of people on the planet – the workers and the poor – come before profit. We don't want to tinker with capitalism – we want to **destroy** it and build a world run by working people themselves.

Anti-sweatshop protest

our planet

is under threat from capitalism's barbarity. Its armies and weapons of mass destruction can plunge entire countries back into the stone age if they fail to do its bidding. Rivers, seas, forests, the whole environment is subjected to pollution or wanton destruction.

Vauxhall strike

global

capitalism keeps dictators or corrupt regimes in business so they can safeguard the interests of the **multinational corporations.** It has plunged the people of developing countries into a recurring nightmare: bloody war, starvation and hopelessness. Capitalism piles up its cash by keeping poor countries in a state of permanent debt to the big western banks, the IMF and the World Bank.

protest

movements across the globe show that there are people everywhere willing to fight back. But so long as we only fight against capitalism's **symptoms** the capitalists have an advantage. They can buy people off or incorporate them with concessions here and there. They can play divide and rule - turning workers, youth and the poor against each other using racism, sexism and homophobia. They use the police and army to repress those who resist.

resistance

to capitalism has always existed. Today it is growing on a global scale. Activists are coming together to fight back against the tyranny of the global giants. Workers in the Indian Sub-continent, in Argentina and Nigeria launched **general strikes** against the dictates of the IMF. Youth from the US and Europe linked up with trade unionists to march against the institutions of globalisation – in Seattle, Washington, Prague, Nice, Cancun, Davos...

join us!

in the fight to build a revolutionary party. Our programme draws together the lessons of the history of working class struggles, focuses them on today's tasks and maps out a strategy for working class power. We are an organisation of activists. We need thousands more to join us - now. You'll be part of a global movement. Workers Power is part of the League for a Revolutionary Communist International, organising across the globe to build a new, revolutionary international.

revolution

...is what we're fighting for. We need to unite all the different struggles and direct our blows against the whole system to end it once and for all. We need a revolutionary party, a party fighting to organise the working class and oppressed in a united struggle to overthrow global capitalism itself. We want to break up capitalist state – the police, the army, Nato, the IMF and World Bank. Socialism will be based on the democratic power of the workers themselves – organised in workers' councils defended by a workers' militia. Then can we abolish poverty and exploitation and create a society where the guiding principle is, **from each according to their ability to each according to their need.**
